

Scenic bridge crossing to wildlife viewing platform

Opening in vegetation for wildlife viewing and maintenance boat/kayak access

Depths of 3 feet and greater create easy maintenance access (by boat) throughout the site

Islands for waterfowl nesting

Lower growing vegetation will allow for a better view from the troll bridge

Dense tree/shrub stands create increased privacy for residents east of Farmer Pond

ADA compliant fishing dock and maintenance boat access

Shallow slopes in Farmer Pond will reduce muskrat activity to maintain adequate water levels

Floating-leafed and emergent vegetation is excellent habitat for game fish species
